## Re-Useable Cold Packs

Great for use with non-refrigerated carts or for extra protection in extreme conditions

### *Eliminate Wet & Dry Ice Hassles Forever*

Before each use, freeze the eutectic liquid contained in the plate. To do this, place the plate in a freezer at a temperature at least 10 degrees below the set point of the plate for 24-48 hours until it is completely solid. Handle with care when frozen as it is sensitive to shock. Do not expose to high heat (120 deg F.) . Eutectic Plates are available in the following temperatures. Choose plate temperature closest to the temperature of your product.

- +26 Deg F. requires +10 to freeze, Holds Refrigeration temperature for beverages, Green cap.
- +3 Deg F. requires -10 to -15 to freeze, Used for Ices or Frozen Foods, Red cap.
- -6 Deg F. requires -15 to freeze, used for Ice Cream, Yellow cap,
- -12 Deg F. requires -20 or colder to freeze, used for delivery or transport of bulk ice cream, Purple cap.
